THE BEAL GROUP

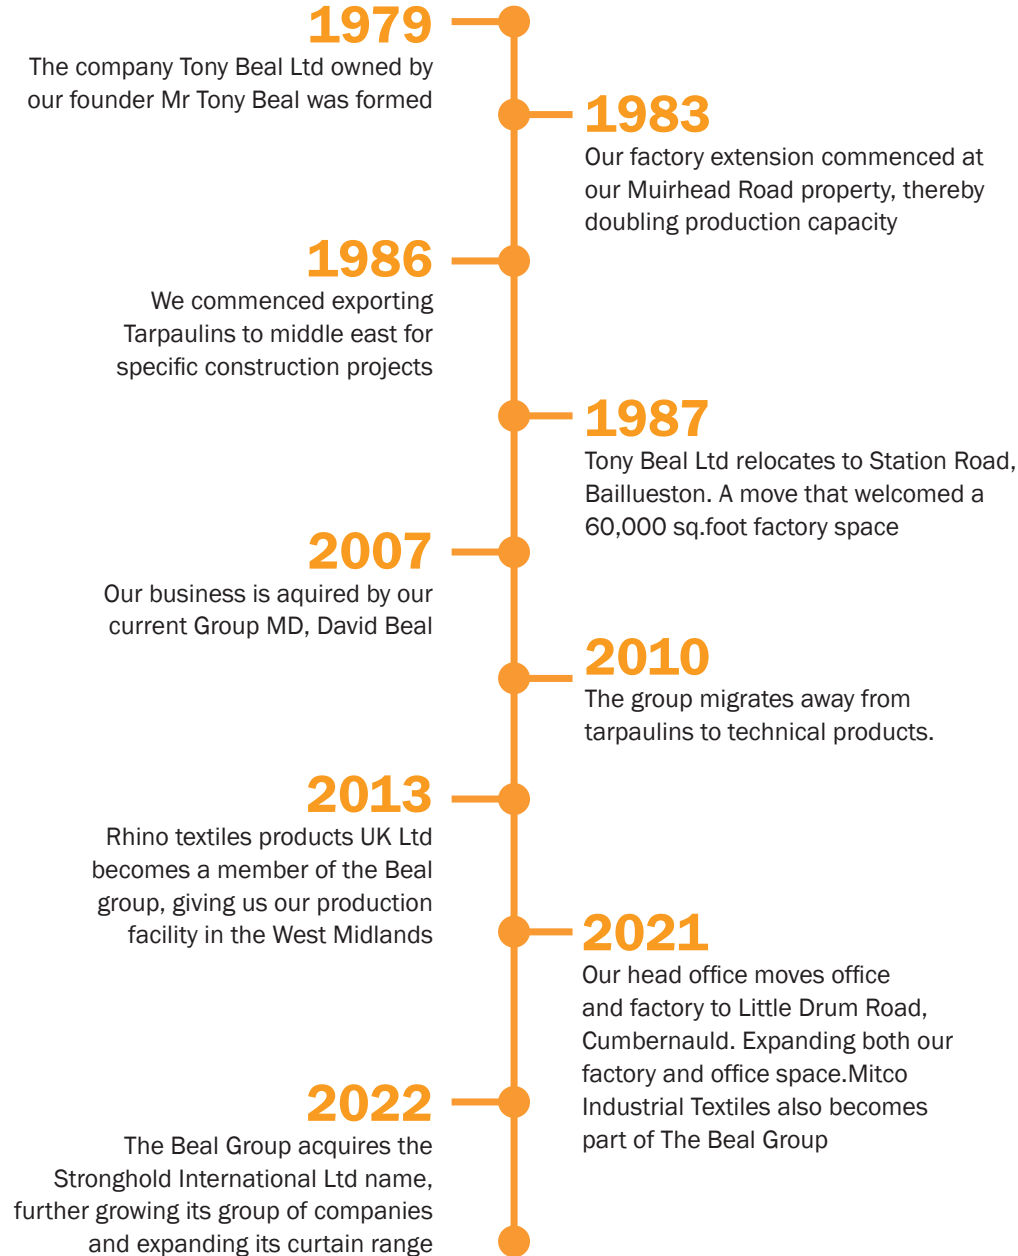

Family-run commercial textile manufacturing business, The Beal Group, is a group of companies originally founded in Glasgow in 1979 as Tony Beal Ltd, which has grown over the past 40 years through innovation and acquisitions, whilst continually being committed to UK manufacturing of quality textile products across various sectors through our individual companies including Mitco, Rhino and Rhino Defence, Stronghold and Graffix Detail.

Passionate about delivering quality products, The Beal Group is synonymous with manufacturing excellence and providing customised and printed textile products that meet the needs of their customers.

Manufactured in the UK, supplying to businesses around the world, our products cover a range of sectors from Oil & Gas, Defence, Automotive, Agriculture, Construction and Sport & Leisure. With a combined production facility of over 110,000 square feet, across our two UK bases, one in Glasgow and one in the West Midlands, we have the capacity to manufacturer over 2,500 items per week.

Our inhouse graphic printing facility that allows for full branding on our products and maximising marketing opportunity for our customers. We have the capacity to fulfil bulk large format screen printing and digital print up to 3.2 metres wide, one of only a few print centres in Scotland that can print up to this width. The huge potential of our printing capabilities means that we can fulfil orders from a wide range of customers, including print companies themselves. Making us the printer's printer.

TIMELINE TO SUCCESS

OUR SECTORS

DEFENCE

We have been serving the UK defence sector for over 25 years, manufacturing quality finished, textile-based products such as tents, bags and valises and covers for vehicles and equipment. As part of The Beal Group, Rhino Defence brings together the manufacturing capabilities of Tony Beal Ltd based in Scotland and Rhino UK in the heart of the Midlands.

Our defence range includes products for use in Military applications, including:

- Tentage
- Nets
- Lifting slings
- Securing straps
- Tarpaulins
- Specialist and custom covers

OIL & GAS

We are a major UK manufacturer of a wide range of industrial textile products tailored to the Oil & Gas sector, from fall arrest safety nets, gangway and side protection nets to tarpaulin covers and accessories. All our products are designed to withstand rigorous testing and specific standards required for the Oil & Gas sector.

Our full range of protective and safety products include:

- Cargo restraining nets and door nets
- Gangway and side protection nets
- Fall arrest safety nets
- Walk on/Access nets
- Shaped and specialist covers

TRANSPORT

At The Beal Group we have a long and established reputation within the transport sector, specialising in manufacturing textile products such as tension curtains, vehicle tarpaulins, title covers, easy sheets and a range of accessories like chains, ropes, and load binders. Many of our products are made to measure so that they fit to the exact requirements of our customers, plus we offer various printing services that mean our products can be branded with logos and messaging.

We specialise in:

- Tension curtains,
- Easy sheets,
- Specialised vehicle tarpaulins,
- Tilt covers and
- Bespoke vehicle covers.

Plus, a range of accessories including ropes, slings, chains and straps.

AGRICULTURE

We have a long-established reputation for providing cost effective solutions for protecting crops, livestock, and machinery in the agriculture sector. We provide high quality products to farmers and supply companies such as:

- Roll over covers,
- Frost protection blankets,
- Poultry window covers,
- Storage and slurry tank covers,
- ATV and other vehicle covers.

CONSTRUCTION AND MODULAR BUILDING

With the demand for modular buildings and off-site construction increasing, there is far greater focus on units being finished in the factory and delivered almost complete. With that benefit, comes the problem of how to protect the units in transit and whilst in outside storage. We provide a full design service and will work with you to achieve a solution to the safe and secure transportation of your modular buildings. Sheets are designed so they can be fitted by one person or lifted over the module in one easy move by Hiab or crane.

AUTOMOTIVE

We have over 40 years' experience within the automotive industry which has allowed us to become the leading company for covers suitable for applications in the automotive industry as well as a range of automotive accessories. Our product range isn't limited to just vehicle curtains and covers, but we have an extended range of accessories and smaller products such as:

- Steering wheel covers,
- Door straps,
- Wheel covers and
- MOT plates.

AIRMOTIVE

We have a range of products that provide secure transportation and storage of airmotive equipment and machinery, designed to a variety of specifications such as size, colour, material and suitability for use. Our airmotive products include:

- Air engine covers,
- Baggage trailer covers
- and securing slings and straps.

SPORT AND LEISURE

We can manufacture a large range of products for the sport and leisure sector and for outdoor use. This includes perimeter nets for 5-a-side football centres, goal netting and mats. We also have a range of outdoor products such as:

- Swimming pool covers,
- Trampoline covers,
- Groundsheets,
- Tents,
- and even BBQ covers.

GRAPHIC ADVERTISING

Graffix Detail is our inhouse printing company that supplies a range of services including digital and screen printing. We can offer branding on a wide variety of our products and can print up to 3.2 metres wide. In addition to offering printed branding on our own products, we offer commercial printing services, both small and large format screen printing and have super wide format digital printing capability allowing us to offer a huge range of printed products from banners, flags, and vehicle livery. Our large format printing capability mean that printers and suppliers turn to us to fulfil their super wide and large-scale projects.

COMMERCIAL REPAIRS

We can offer a range of commercial body repairs at our facility. This includes repairs and maintenance to floors, doors, tracks, and tension curtains. Plus, we can also offer repairs on your graphic printing and decals.

SECOND LIFE™

Recycling and regeneration programme from The Beal Group

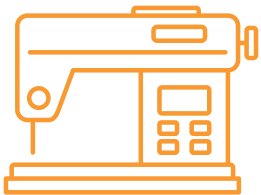

PRODUCED & REUSED

Branded product is manufactured to customer's specification at one of our UK factories using the best quality materials that are durable, strong and weather-proof allowing for the longest life possible and multiple uses.

REVIEWED

After time, and multiple uses, the product can be returned to our UK based recycling centre to be assessed by our experts who will decide the best option for the product. We endeavour to repair as many products as possible before sending on to our **Second Life™** programme

REPAIRED

If the product is deemed repairable, for example, slight wear or rips to the material, we will repair and return to the customer. Through the repair service we can extend a product's initial lifecycle and more than double its number of uses.

SECOND LIFE™

As with all products, there comes a natural end to their life cycle and despite our efforts, will become irreparable. When this time comes, the product will be given a new lease of life and enter into our **Second Life™** programme.

There are several routes that the product can take after it has gone through the **Second Life™** programme.

- Insulation products for sound and agriculture
- Waste protection products
- **Second Life™** products such as bags and laptop cases
- Reusing the materials for products within your supply chain such as pallet or machinery covers.

Our main focus for the future is sustainability, and how we can create a process that eliminates waste by developing our products so that they last longer and have multiple uses. We haven't stopped there, we also wanted to create a process that increases a product's lifecycle even further by being repaired and then given a 'second life' through regeneration.

We will supply a CO2 certificate for any customer that uses our recycling programme detailing the carbon emission savings made through **Second Life™**

OUR RECYCLING CENTRE

At our UK based recycling centre we estimate that we'll be able to process 2,500 tonnes of fabric per annum, saving upto 16,400 tonnes of CO2 every year.
